Forms are in the office.

ECLIPSE

REMINDER

April 8th will be a virtual day for KHS due to the eclipse! Assignments will be posted online.

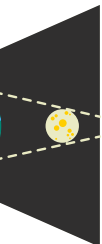

Spring Break March 25-April 5

ECLIPSE COMING TO KHS

The impending eclipse!

2nd Week of March/ 2024

7th Edition

On April 8, 2024, a total solar eclipse will cross North America, passing Mexico, the United States, and Canada. The eclipse will begin over the South Pacific Ocean and continue through various states, including Mexico, the United States, and Canada. It will exit on the Atlantic coast of Newfoundland, Canada.

A solar eclipse occurs when the Moon passes between Earth and the Sun, blocking the view of the Sun from a small part of the Earth, totally or partially. For us, it will be a total solar eclipse.

We are lucky enough that Knightstown happens to fall in the line of totality, meaning we'll be able to experience the eclipse firsthand from our very own

hometown. This is pretty much a once in a lifetime thing and many people will be coming to Knightstown during the day of the eclipse just to witness it. The longest duration for a total solar eclipse possible is 7.5 minutes. During this eclipse the shadow of the Moon races across the Earth at 2410 mph. Partial solar eclipses can be seen up to 3,000 miles from the "track" of totality. The maximum number of solar eclipses, whether they are annual, total, or partial, is 5 per year, and there are at least 2 solar eclipses per year somewhere on the Earth. Everyone in the continental U.S. will see at least a partial eclipse in their lifetime.

Total eclipses occur on average, every 18 months. However, from the same place on Earth, you can only see one about every 300 to 400 years. This is admittedly one of the coolest things to happen to this town!

ECLIPSE - TAYLOR SWIFT MOVIE - FUN FACTS-TRIVIA

Midnights

TAYLOR SWIFT'S NEW MOVIE

Taylor Swift on the big screen!

2nd Week of March/ 2024

7th Edition

Music sensation Taylor Swift has risen to the top faster than any artist in our time. In 2022, she released her latest album, *Midnights*, which she followed with an incredible tour. March 17th, 2023, Taylor kicked off her tour in Glendale, Arizona, which was absolutely ethereal. The tour in which she plays hits from all of her albums is called "The Eras Tour."

This tour wasn't just in the US, but around the world! In August of 2023, Taylor performed in Los Angeles, and they recorded the whole thing. A few months later, in October, the movie was shown in theaters, making it available to so many who couldn't make it to the live shows. I was one of the lucky ones who got to experience the "Eras Tour" in theaters, and let me tell you, it was unforgettable. Everyone was dancing, singing, and trading friendship bracelets.

Wait, there's more! The movie, with three added songs, was just added to Disney Plus last night! I'm so excited to stream it tonight with my family, and I highly recommend you do the same (if you have three hours to spare, that is!). Get ready to be blown away by Taylor's incredible vocals and stage presence.
